IEEE Hyderabad Section and AP/EMC/MTT Joint Society Chapter in association with IEEE Student Branch of Matrusri Engineering College (SB Code: STB17791 School Code: 60105217) hosted an IEEE EMC- Society Distinguished Lecture on

“A PRACTITIONERS APPROACH TO EMC TESTING WITH REVERBERATION CHAMBERS”

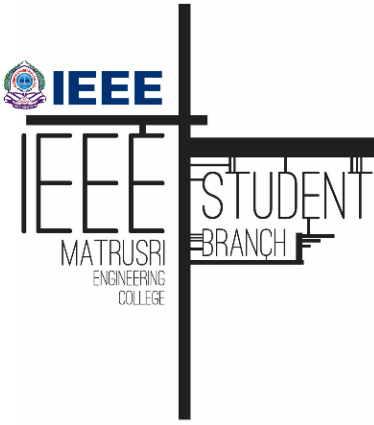

by Dr. Vignesh Rajamani , Vice President IEEE EMC-S USA Assistant Professor, EE Department, Oklahoma State University, USA on 17th Dec 2015 from 1030-1230 Hours at the Matrusri Engineering College Campus, Saidabad.

The talk discussed the efficiency of reverberation chambers to perform emissions and immunity tests. The statistically isotropic, randomly polarized, and uniform electromagnetic environment present inside a well stirred reverberation chamber enables a robust, basically an all aspect angle test.

The controllable uncertainty of a reverberation chamber test method provides the test engineer options to design a test depending on whether the test is a simple product qualification test or a mission critical system test to be undertaken.

The guest lecture was attended by about 125 students from various colleges across the city and was very well received.

IEEE Matrusri Engineering College Student Branch expresses its gratitude to all who have made it a learning experience for the students.
